

2-Mercaptobenzothiazole (MBT)

CAS No 149-30-30

Specification:

items	index
Appearance	Yellow transparent liquid
Active content(wt) %	50.0min
Density (20°C) g/cm ³	1.20min

Properties and Usage:

This product can be used as the copper corrosion inhibitor in circulating cool water system. The mechanism is due to the chemical absorption of MBT on copper surface, or chelation reaction between them. The dosage of 4mg/L is preferred. This product can also be used as plasticizer and photometer for acid copper plating.

Package and Storage:

25kg in plastic barrel, or confirmed by clients. Storage for six months in room shady and dry place.
